Yachting and diving around Port-Cros

Scuba diving around Port-Cros

Scuba diving is a scuba diving suit in the waters of the National Park is prohibited except for holders of a diving authorization.

To obtain this authorization, each individual diver or each diving establishment must send a registration online on the CaPeL website (Online Dive Log) https://capec.l-parcnational.fr.

This website allows him to sign the rules and transmit his diving data.

Dive registration notification to the National Park house remains necessary in order to obtain the “diving” sticker that is required to be affixed on the boat.

The diving regulation stipulates a limitation to 40 divers simultaneously per site and prohibits certain behaviors of the habitats and species. It is enforced in particular on:

• Feed fishes; they must stay wild
• ... barge rocks
• get in touch with the bedrock or animal or plant specimen

For this reason, the learning of diving is regulated. Nighttime diving is regulated because the intensity of underwater light disrupts the marine environment.

Divers, signal yourself at the surface with regulatory flags!

• For your safety, mooring is not authorized outside a radius of 100 meters around diving sites.
• Authorized divers (individual or commercial) have priority for mooring on diving buoys. Several vessels up to a limit of 5 vessels can moor there simultaneously during the time required for the dives. Mooring is prohibited for vessels over 15 meters.
• During the mooring time, the presence of a person on board able to maneuver the vessel is necessary. Any vessel unable to maneuver the vessel is prohibited.
• During the diving time, the presence of a person on board able to maneuver the vessel is compulsory during the busy periods of May and June and from 9 am to 5 pm in July and August on the sites of following dives: La Gabinière, la Croix, le Vaisseau and la Galère.

For your safety, scuba diving is a scuba diving suit in the waters of the National Park is prohibited except for holders of a diving authorization.

Recreational fishing is regulated. Visit the website www.portcrosparcnational.fr to know the times, areas and practices that are authorized.

Sparefishing is prohibited.

Professional fishing is regulated and subordinated with the yearly signature of a partnership charter with the national park.

Numerous marine animals live in the rocks or in the posidonia meadow. Observe them without disturbing them!
